FROM ANDERSEN CORPORATION

YOUR CHOICE OF

**4** COMPLETE

WOOD WINDOW

UNITS...

carefully engineered...

precisely manufactured

Andersen WINDOWWALLS, America's best-known wood window units, are manufactured by Andersen Corporation, Bayport, Minnesota. Andersen Window Units are sold only through regular millwork channels.

Through the years, the exclusive use of quality materials, accurately milled and fitted, has earned for Andersen Windows a permanent reputation for satisfaction with architects, builders and their clients.

**INSTALLATION**—Famous Andersen WINDOWWALLS will give years of outstanding service if *they are properly installed and maintained*. Proper installation is easy and rapid when manufacturer's instructions are followed.

**STRUCTURAL BEAUTY.** Wood windows add to the beauty of design and decoration with the warmth and character that only wood can give. They take paint and color or natural finish, give depth of shadow line. Wood adds to the beauty of Andersen WINDOWWALLS.

**POSITIVE INSULATION.** Wood sash and frames have low thermal conductivity. Won't heat excessively in the summer. Help fight frosting and sweating in winter. WINDOWWALLS contribute to more comfortable living.

**EASE OF OPERATION.** Wood can be precisely milled, easily weatherstripped. Wood windows lend themselves readily to accurate adjustment for faultless operation. WINDOWWALLS provide operating superiority—are easy and economical to install, too.

Andersen Gliding Windows. Two Units No. 58058

## ALL THE ADVANTAGES OF WOOD WINDOWS

**LASTING SERVICE.** No Andersen Window Unit will ever have to be replaced because of rust or corrosion. Wood windows can't bleed. Toxic chemical preservatives protect WINDOWWALLS against destruction by rot or termites.

"An Andersen Distributor For Over 25 Years"

NOTE THE FEATURES OF THE  
**Andersen CASEMENT WINDOW**

**TOXIC WATER REPELLENT PRESERVATIVE**

Protects wood against decay, repels termites and other similar insects, and is water repellent to minimize shrinkage, swelling and warping.

**Superior Construction of  
ANDERSEN CASEMENT WINDOWS**  
provides the maximum of  
Window Beauty, Weather-tightness  
and Easy Operation

1. Strongly reinforced corner joint holds sash square.
2. Section through double glazing panel showing weatherstripping seal. The double glazing cuts radiation heat loss 60%.
3. Special design of sash eliminates sticking and binding. High quality glass, bedded in glazing compound.
4. Weatherstrip attached to sash bottom rail makes tight seal at sill.
5. Vents for space between double glazing and sash help control condensation and frosting.
6. Frame sill has Andersen Master leakproof construction with lock sill joints and weather tight windbreak.
7. Underscreen sash operator opens window easily and quickly. Holds sash in any open position.
8. Extension hinges swing sash out so that outside of glass can be washed from the inside.
9. Spring tension weatherstripping comes attached to frame at head and sides.
10. Popular flat type aluminum inside screen. Comes with fasteners attached. Lightweight, attractive and durable.
11. Sash lock pulls sash completely shut, then locks it. Also ejects it for easy opening. Independent of screen.

**INCLUDED FEATURES**

**EASY TO WASH . . .  
FROM THE INSIDE**

**EXTENSION HINGES** swing sash out away from the frame. Outside glass surface is easily washed from the inside. Picks up a breeze from either side of the window and directs it into the room.

**EASY TO OPERATE**

**SASH LOCK** holds window firmly shut, ejects sash out to be easily opened.

**ROTO GEAR** swings sash to any position and holds it there without rattling. Both Lock and Operator have a handsome Statuary Bronze-Plated finish, and work independently of the screen.

**OPTIONAL EQUIPMENT**

**ALUMINUM SCREEN** is easily removed from the inside by simply turning the catches (no tools required) and lifting the screen out.

**REMOVABLE DOUBLE GLAZING** is removed as easily as the Screen in exactly the same manner.

**WELDED INSULATING GLASS** provides insulation the year around. Two panes of glass welded together and hermetically sealed eliminate the need of Removable Double Glazings.

## THREE IMPORTANT REASONS FOR USING Andersen CASEMENT WINDOWS

### ... Easy Operation

*Unit No. 2N3*

**... Beauty**  
*Unit No. WN35N*

**... Plenty of Sunshine and Fresh Air!**  
*Unit No. N34N*

## DETAILS FOR

## Andersen CASEMENT WINDOWS

**C-10**—Installation of standard unit in frame wall. Note reversible windbreaks for either  $\frac{3}{4}$  or  $\frac{1}{2}$  inch sheathing. Plaster reveal inside finish can be used in place of extension jambs and casing trim. The same standard unit is used in all types of wall construction. Additional installation details furnished on request. Trim members should be ordered separately to conform to individual requirements.

Note: Allow for Wide Windbreaks when applying Sheathing before unit is installed. See details below.

**THE ANDERSEN CASEMENT UNIT** combines advantages of weather-tight wood construction with beauty of contemporary narrow-line design. Full weatherstripping, double glazing and leakproof frame give exceptional window insulation. Precision manufacture means it's easy to operate, easy to install, highly weather-tight, attractive in appearance.

**ENGINEERED FOR EFFICIENT SERVICE.** Extra thick 2" sash with reinforced corner joints mean sash cannot stick or bind. Compression weatherstrips assure tightness with free-and-easy operation. Ejecting lock releases sash, easily breaks paint bind. Holds sash firmly shut. Works independently of screen. Extension hinges permit easy washing of outside glass from inside. Roto-gear underscreen operator holds sash in any open position.

**COMPLETE UNIT INCLUDES:**  
 FRAME • INSIDE STOPS • MULLION CASINGS • WEATHERSTRIPPING  
 GLAZED SASH • COMPLETE HARDWARE FOR VENTILATING SASH  
 INSIDE SCREEN (optional) • DOUBLE GLAZING (optional)  
 EXTENSION JAMBS (optional)

Section through jamb at right shows location of compression weather-strip, removable double glazing on inside of sash and inside screen. Note sash construction with two point "refrigerator door" contacts and full  $\frac{1}{8}$ " clearance between sash and frame.

Scale  $1\frac{1}{2}'' = 1'0''$

**Detail No. C-20**  
 Brick veneer construction with windbreaks set flush with sheathing.

**Detail No. C-36**  
 S.C.R. brick construction. Lath and plaster on 2" furring strips.

## DETAILS FOR COMBINING

## Andersen CASEMENT WINDOWS

**MULLION A.** Used where load bearing structural members are needed.

**MULLION B.** Side jambs are joined back to back to form narrow mullions. Sill may be butted or scarfed.

**MULLION C.** Standard mullion furnished by Andersen.

The diagram illustrates six window frame options, each with a height of 5'-7 1/4" and a width of 5'-6 1/4". The frames are arranged in two rows: the top row contains CN25N, CN35N, and CN45N; the bottom row contains CH25H, CH35H, and CH45H. Each frame is shown with its width divided into three equal sections. To the left of the frames, a vertical bracket indicates the height, and a horizontal bracket indicates the width. The height is labeled as 5'-7 1/4", and the width is labeled as 5'-6 1/4". The width is further divided into three sections, with the first section labeled as 5'-2 1/8".

THE CINCINNATI SASH & DOOR CO.

NOTE THE FEATURES OF THE  
Andersen FLEXIVENT WINDOW

LOOK! THREE USES FOR ONE WINDOW

1. with outswinging awning sash . . .

2. with inswinging hopper sash . . .

(Inside View) (Outside View)

3. with outswinging casement sash . . .

Quality — Versatility — Economy

Here's the most versatile window you ever saw! Literally hundreds of combinations are possible.

The Andersen Flexivent Window can be installed in any of three positions—a different sash operation for each position. Combine Flexivents in stacks, ribbons or groups. Choice of fixed or operating sash. Combine Flexivents with fixed glazing. Or build them into big WINDOWALLS using the new Andersen Flexiview Unit, picture window partner to the Flexivent.

The combinations possible are almost limitless. Flexivent Window Units are engineered for easy operation, superior weather-tightness. Sixteen sizes—up to  $44\frac{3}{8}$ " by 49" glass size. Yet with all its features, it is definitely an economy window.

EASY TO WASH FROM THE INSIDE

SLIDING HINGES allow sash to swing to wide open position to be easily washed from the inside.

VENTILATION during a rainfall is possible due to Flexivent special design when used in either Awning or Hopper position.

SASH LOCK pulls sash rail tight against sill to insure positive contact with the weatherstrip. On larger sizes, two locks (one at each end of sash rail) insure tight closing for weather-tight seal.

Cincinnati 29, Ohio

"An Andersen Distributor For Over 25 Years"

DETAILS FOR  
**Andersen FLEXIVENT WINDOWS**

Specially designed dual purpose head and sill members and an interchangeable lock permit reverse installation to provide either projected sash (awning vent) or inward opening sash (hopper vent) with the same basic unit. The head member shown in the detail at left becomes the sill when installed in the reverse position as shown in the right hand detail.

Sash are glazed with quality vision tested glass by a new improved groove glazing method.

Factory assembled unit as furnished by Andersen includes *frame* and *sash*, with sash hung on *sliding hinges* and *weatherstrips* installed.

Exterior casings, subsills and other parts required to complete the installation are to be supplied locally.

Additional Details will be furnished upon request.

**OUTSWINGING  
OR AWNING VENT POSITION**

**DETAIL No. FO-10.** Unit installed in frame wall with exterior casing and subsill.

**INSWINGING  
OR HOPPER VENT POSITION**

**DETAIL No. FI-20.** Unit installed in brick veneer wall construction.

SCALE: 3"=1'-0"

## HOW TO FIGURE OPENING SIZES FOR Andersen FLEXIVENT MULTIPLE UNIT COMBINATIONS

**OVERALL SASH OPENING WIDTH** — The sum of the individual sash openings plus 3" for each mullion section.

**OVERALL ROUGH STUD OPENING WIDTH** — Add 3½" to overall sash opening width.

**EXAMPLE** — For a group of nine units No. 318.  
(As shown in elevation below)

3 individual sash openings 3' 2" each	9' 6"
Add for 2 mullions	6"
Total sash opening width	10' 0"
Add for rough stud opening	3½"
Total overall rough stud opening width	10' 3½"

**OVERALL MASONRY OPENING WIDTH** — (2" Brick Moulding) — Add 6" to overall sash opening width.

### TYPICAL ARRANGEMENTS Flexivent Unit No. 318

Units can be easily and quickly joined with corrugated fasteners or by toe nailing reinforced by trim members as shown in sectional details.

**OVERALL SASH OPENING HEIGHTS** — The sum of the individual sash opening heights plus 2½" for each stack section.

**OVERALL ROUGH STUD OPENING HEIGHT** — If 1½" x 4" subsill is used, add 5¼" to overall sash opening height. If no subsill is used, add 3½" to overall sash opening height.

**EXAMPLE** — For a group of nine units No. 318 with 1½" x 4" subsill.

3 individual sash openings 1' 8½" each	5' 0 3/8"
Add for 2 stack sections 2½" each	5 3/4"
Total sash opening height	5' 6 1/8"
Add for rough stud opening	5 1/4"
Total overall rough stud opening height	5' 11 3/8"

**OVERALL MASONRY OPENING HEIGHT** — (2" Brick Moulding and 1½" subsill). Add 5¾" to overall sash opening height.

### DETAIL SECTIONS

Scale — 1½" = 1'-0"

Section A-A

Stack section with awning vent sash — also casement mullion.

Section B-B

Stack section with upper sash fixed and lower sash hopper vent.

Section C-C

Mullion with awning vent sash.

Section D-D

Mullion with hopper vent sash.

Section E-E

Stack section with both sash hopper vent.

Flexivent groups 3 wide and 3 high or smaller will resist reasonable wind pressures when the units are assembled and installed as recommended by the Andersen Corporation. Groups larger than 3 wide and 3 high require some type of continuous reinforcing member installed at the mullion. For example a ¾" x 4" plywood support running from header to plate, cross nailed through the Flexivent jamb would increase the resistance of the Flexivent group against wind pressure. For recommendations on special wind pressure problems, please consult an architect or structural engineer.

## Andersen FLEXIVENT USED AS A CASEMENT WINDOW

Although the Andersen Flexivent can be used as an outswinging casement window, it does not have all of the desirable features of the Andersen Casement shown on Page 6 and we recommend using the Andersen Casement. Never install unit as an in-swinging casement. We recommend all sash, in multiple units, be hinged on the left as viewed from the outside in order to maintain narrow mullions and correct handle position.

### CASEMENT TABLE OF SIZES

#### FOR MULTIPLE UNIT COMBINATIONS

**OVERALL SASH OPENING WIDTH**—The sum of the individual sash openings plus  $2\frac{7}{8}$ " for each mullion section.

**OVERALL ROUGH STUD OPENING WIDTH** — Add  $4\frac{1}{2}$ " to overall sash opening width.

**EXAMPLE** — For two units No. 318.

2 individual sash openings	$1'-8\frac{1}{8}$ "	$3'-4\frac{1}{4}$ "
Add for one mullion		$2\frac{7}{8}$ "
Total sash opening width		$3'-7\frac{1}{8}$ "
Add for rough stud opening		$4\frac{1}{2}$ "
Total rough stud opening width		$3'-11\frac{5}{8}$ "

**OVERALL MASONRY OPENING WIDTH**—  
(2" Brick moulding.) Add  $5\frac{1}{4}$ " to overall sash opening width.

Detail showing casement head and sill sections. Interior and exterior casing not furnished by Andersen.

## Andersen 3-8 FLEXIVENT AND FLEXIVIEW WINDOW UNITS, ESPECIALLY FOR LU-RE-CO PANELS

Check with Lu-Re-Co plans for exact size of panels and method of assembly.

Prices for the #3810 size are the same as the #3814 prices on Page 27.

Note: The #3810 size is not available glazed with Welded Insulating Glass.

### WINDOW PANELS

MULLION

Window units should be centered within each panel.

## NEW Andersen SEAL-TRIM

Seal-Trim is truly something "Different and Better." Seal-Trim includes Exterior Casings, Aluminum Flashing, Subsill, and Exterior Mullion and Transom Casings. All wood parts are treated with a Toxic Water Repellent Preservative *after* they are cut to unit size. The side casings are equipped with a vinyl plastic sealing gasket as shown in Figure 1. Aluminum flashing is furnished with the head casing as shown in Figure 2. Figure 3 shows the special contour of the subsill which provides a shoulder contact with the siding, the sheathing, and the jamb. These exclusive Seal-Trim features insure a weathertight joining to the wall which may be universally adapted to different types of wall construction.

Figure 3

## OPTIONAL EQUIPMENT

## Roto-Lock Operator

A new under-screen operator for awning style ventilating units. The centrally located Roto-Gear, dual arm operator provides positive control, snug corner closing and self-locking in any position. Snap release permits easy cleaning of sash. Color: Statuary Bronze. A special pine stop is furnished with each operator. The Roto-Lock Operator can be easily installed on existing awning style installations, however, a smaller screen is necessary to allow for the stop.

Price Each, Bronze Finish..... \$ 7.00  
Price Each, Chrome Finish..... 11.00

## New Bar-Lock Operator

Built-in bow in deflection-bar mounted on sash causes spring action in the center that brings corners of sash in tight. Sash may be open in several different positions without the bar projecting into the room. Color: Statuary Bronze. The Bar-Lock Operator can be easily installed on existing out-swinging installations, however, a screen to permit Bar-Lock operation is necessary.

Price Each, Bronze Finish..... \$3.28  
Price Each, Chrome Finish..... 5.28

Credit for each Sash Lock returned in original package \$0.80.

**ALUMINUM SCREEN** is hinged to easily swing to open position. Screen is on inside for Awning and Casement Type Flexivents, on the outside for Hopper Type Flexivents.

**REMOVABLE DOUBLE GLAZING** is select quality window glass with an Aluminum Frame. *It should always be placed on the outside of your Flexivent Windows.*

**WELDED INSULATING GLASS** provides insulation the year around. Two panes of glass welded together and hermetically sealed eliminate the need of Removable Double Glazings.

**SNAP LOCK** is designed for Hopper Type Flexivents when it is located above normal reach. Can be operated with a hook or standard make window pole.

Price Each  
Bronze Finish..... \$1.56  
Chrome Finish..... 3.52

## Andersen INDIVIDUAL FLEXIVIEWS

### Frame A View

Andersen Flexiview Units are the picture window partners to the versatile Andersen Flexivent. Combinations of Flexiviews and Flexivents provide a frame for a pleasant view plus ample sunshine and ventilation. Flexivents may be stacked either below and/or above Flexiviews as shown on pages 36 and 37. Two #22 height Flexivent Units may be stacked two-high and be used on either side or on both sides of the Flexiview as shown on page 38. The #30 height stacked with a #14 height will also line up with the Flexiview. Versatile combinations like these allow a variety of arrangements of window beauty.

### KNOW WHAT YOU ARE PURCHASING

**BASIC UNIT INCLUDES:** Set-up Frame completely weatherstripped and treated with a Toxic Water Repellent Preservative, Glazed Sash, Stationary; Sash may be ordered glazed with Insulating Glass. Removable Double Glazing may be ordered separately. *Does NOT include Exterior Casings, Drip Cap, Subsill, or Mullion and Transom Casings.*

Picture Sash, Glazed Insulating Glass.....  
Picture Sash, Glazed DS.....  
Removable Double Glazing.....

Flexiview Units are glazed with selected quality vision-tested window glass. The glass is specially cut and glazed to eliminate objectionable distortion when the unit is used in the vertical position as shown. If the unit is installed horizontally, it is possible that the advantages of the selected cutting of the glass will be lost.

For Bar-Lock Operator applied on any Sash in #200 Series, Add \$3.60 per Sash.

For Bar-Lock Operator applied on any other Sash, Add \$2.80 per Sash

**Never install Unit as an inswinging casement.** We recommend all sash in multiple units be hinged on the Left as viewed from the outside in order to maintain narrow mullions and correct handle position. See page 24 for details.

#### ANDERSEN CASEMENT WINDOWS

FLOOR MODEL—Display Sample No. W2N3 or No. W2H3 with two sets of Roto Gear Hardware, one Screen, and one Removable Double Glazing Panel. Pine inside trim. Display completely assembled and varnished.....\$51.32

Add \$9.32 if Welded Insulating Glass is wanted in one sash.

#### ANDERSEN FLEXIVENT WINDOW

FLOOR MODEL—Display sample No. 31813 consisting of three units No. 318 stacked. Top unit awning type sash with Aluminum screen. Center unit awning type sash with Aluminum screen and either Roto Lock Operator or Bar Lock Operator. *Be sure to specify the type of operator you desire.* Bottom unit hopper type sash, Aluminum screen and Removable Double Glazing. One of awning type sash may be ordered with Welded Insulating Glass.

Display completely assembled with stand and varnished \$50.64.

Add \$9.32 if one sash is to be furnished with Welded Insulating Glass. Add \$2.68 if both Roto-Lock and Bar-Lock Operator are wanted.

#### ANDERSEN GLIDING WINDOW

FLOOR MODEL—Display Sample No. 48038 or No. 4838 with Screen, one Removable Double Glazing Panel and Pine Trim. Display assembled and varnished....\$47.36

#### ANDERSEN FLEXIVIEW WINDOW

FLOOR MODEL—Display sample No. 134PA consisting of one Flexiview unit No. 349 glazed DS installed above one Flexivent unit No. 314 hopper vent sash, glazed SS, Aluminum screen and Removable Double Glazing.

Display completely assembled with stand and varnished.....\$38.00

Add \$20.00 for Flexiview sash glazed with DSA Twindow.

#### ANDERSEN PRESSURE SEAL D. H. WINDOW

FLOOR MODEL—Display Sample 2-8 x 3-10 with Andersen Combination Window installed. Model is completely assembled and varnished.....\$39.32

Deduct \$13.32 if Andersen Combination Window is not wanted.

#### ANDERSEN BASEMENT WINDOW

FLOOR MODEL—Display sample No. 2817 complete with screen and storm panel.

Display completely assembled with stand and varnished.....\$18.68

Basement Unit No. 2817 with screen and storm panel is available installed below any of the displays in the left column at extra cost of \$6.68. However, this method is not recommended because of poor position for demonstration and loss of display sign.

## Andersen Windowwalls

DISTRIBUTED BY

THE

*Cincinnati Sash & Door Co.*

4500 Reading Road

Cincinnati 29, Ohio

"An Andersen Distributor For Over 25 Years"

## NOTE THE FEATURES OF THE Andersen GLIDING WINDOW

**EASILY OPENED—EASILY CLOSED.**  
Plastic track permits sash to be operated with a minimum of effort.

**EASILY WASHED—FROM THE INSIDE.** Sash lift right out of the frame (no tools required), makes washing windows a simple task.

**REMOVABLE DOUBLE GLAZING** fits right on the sash, opens with the window, is easily removed by turning catches and lifting it out of place.

### FOR MODERN WINDOWWALLS

Andersen Gliding Windows with horizontal sliding action allow wide range of sizes with ventilating sash—from ribbon type to large picture window openings for every room in the house. Ideal for enclosed porches and breezeways.

#### NOTE THESE SUPERIOR FEATURES

1. **WEATHERSTRIPPING** — Compression and interlocking type completely installed. Double weatherstrip contact with metal sill channel.
2. **OUTSIDE SCREEN** — (Optional) — Pine frame, fine mesh Alcoa, Alclad Aluminum wire cloth. Special hardware locks screen tightly on inside. Can be easily put on or removed from inside.
3. **SASH** —  $1\frac{1}{2}$ " thick, quality glass bedded and glazed with elastic glazing compound, fitted and complete with hardware installed.
4. **DOUBLE GLAZING** — (Optional) — Wood frame, fits on outside of gliding sash, controls condensation and heat loss — can be left on year around — easily removed for cleaning.
5. **STORM-SCREEN FEATURE** — Double glazing panel also fits on inside of screen to make an outside storm sash for closing openings during rough construction — or for triple glazing to provide extra insulation against heat loss and condensation.
6. **PLASTIC SILL TRACK** — Makes sash operate smoother and easier. Has a permanent natural wood finish that cleans easily.
7. **FRAME** — Leakproof construction with famous Andersen Lock Sill Joint and weather-tight blind stops.
8. **COMPLETE HARDWARE** for sash, screen and double glazing. Iridite treated heavy zinc plating with statuary bronze finish on lock handle. Triple action lock draws sash tightly together at top, bottom and center.
9. **PLASTIC FACED HEAD TRACK** — Combination head jamb and track is plastic faced to improve appearance and operation, bring greater durability.

## DETAILS FOR Andersen GLIDING WINDOWS

## INSTALLATION DETAILS

Scale—3" = 1'-0"

G-10—Standard unit in frame wall with lath and plaster inside finish and  $\frac{3}{4}$ " sheathing. The extension blind stop can be rabbeted for  $\frac{1}{2}$ " sheathing and this should be specified when ordering the unit. Extension jambs and other trim should be ordered separately to conform to individual requirements. Installation is similar for stucco or brick veneer or for dry wall inside.

Detail shows Removable Double Glazing panel in place on outside of sliding sash. This same panel also fits in rabbet on inside of the screen to provide an outside storm sash for closing openings during rough construction.

## NOTE

Complete 1/4 scale Installation details will be found in the Tracing Detail File. This will be mailed on request at no charge.

## ADAPTION DETAILS

Scale— $1\frac{1}{2}$ " = 1'-0"

## STANDARD MULLION

Detail shows 4-inch mullion made by placing two standard single units together with sill horns butt jointed and regular casings back to back.

## NARROW MULLION

Where a load bearing support is not required, single units can be joined to form a 2-inch mullion as shown above.

## CORNER

Detail shows corner construction with standard two-inch sill horns and casing. Long sill horns can be furnished for special corner casings.

## ANGLE BAY

Detail shows 45° angle bay mullion using standard units with long sill horns and special outside casings (not furnished by Andersen).

DETAIL NO. G-20. Brick veneer wall construction. Blind stop set flush with sheathing. Extension jambs and wood inside trim.

DETAIL NO. G-36. Solid masonry wall using S.C.R. brick. Lath and plaster applied on 2" furring strips.

THE CINCINNATI SASH & DOOR CO.

# THE Andersen PRESSURE SEAL

Three Units No. 3-0 x 4-6 Type 22

ONE OF THE FOUR FAMOUS

# Andersen Windowwalls

DISTRIBUTED BY

THE

*Cincinnati Sash & Door Co.*

4500 Reading Road

Cincinnati 29, Ohio

"An Andersen Distributor For Over 25 Years"

## NOTE THE FEATURES OF THE Andersen PRESSURE SEAL

### New Ejection-type Sash Lock

Ejection principle means lock cannot interfere with sash operation, cannot mar or damage sash or muntins. Positive action reaches out and pulls sash rails firmly together. Easy to center on check rail regardless of division of lights. Permits locking even with as much as  $\frac{3}{16}$ " misalignment of check rails. Holes pre-drilled for ease of application.

Exclusive Pressure Strip Action is key to exceptional weather-tightness, smooth sash action, and sash removability. Wedge-like action of aluminum Pressure Strips forces sash against metal covered parting stop. Closes cracks and eliminates necessity for conventional weather-strip on sides. Sash are completely free when thumb levers are depressed, held tight when levers are released.

1. Sash removable instantly. Not attached to any counter balancing devices.
2. No Rattling. Pressure Strips force sash tightly against parting stops, hold sash firmly in open or closed position.
3. Easy to move sash because depressing the thumb levers leaves sash completely free. No weather-stripping friction.
4. Rugged sash full  $1\frac{1}{2}$ " thick. Gives extra strength and years of service.
5. Positive action metal weather-strip keeps window weather-tight at sill, head, and check rail.
6. No sash lifts required.

### EASY TO WASH . . . FROM THE INSIDE

Sash slip right out of the frame making window washing a simple task.

### QUICK AND EASY INSTALLATION REDUCES FINAL COSTS

#### NAIL FRAME IN ROUGH OPENING

The frame is set in rough openings and held in place by nailing wide blind stop to studs. A weather-tight wall joint is assured.

**Sash come complete** with pressure strips, weather-stripping and operating mechanism installed, ready to be slipped in place from the inside. No weights to

#### SLIP SASH INTO PLACE

hang. No counterbalancing devices to install.

**The standard frame** detail can be used in any type of wall. The moulded inside stop on the side jamb greatly simplifies trimming out. A special fitted stool is included and only a simple inside casing or band moulding is required to complete the job.

## DETAILS FOR THE Andersen PRESSURE SEAL

### INSTALLATION DETAILS — SCALE 3" = 1'-0"

Details show installation in standard frame wall with reversible wide blind stop in proper position for  $\frac{3}{4}$ " sheathing. Position is reversed for  $\frac{1}{2}$ " sheathing. Installation is the same in brick veneer wall with blind stop flush with sheathing.

Standard left and right-hand jambs are furnished for mullion posts. The deep sash run in right-hand jamb is required for sash removal. Note how moulded inside stops form a mullion casing. Regular casing can be added if desired.

#### THE COMPLETE UNIT INCLUDES:

**FRAME**—Special leakproof construction with reversible wide blind stop, and undersill windbreak. Also includes combination inside stop and trim member.

**SASH**— $1\frac{1}{2}$ " thick, glass bedded and glazed with elastic glazing compound.

**SASH LOCK**—Sash are predrilled at factory to receive locks for easy application.

**GLASS**—Selected quality vision tested glass.

**PRESSURE STRIPS** — Installed in sash at factory.

**WEATHERSTRIPS** — Check and bottom rail strips attached to sash.

**OPERATING MECHANISM**—Installed in sash at factory.

**STOOL**—Clear Pine,  $2\frac{1}{4}$ " width only.

(Details shown below are not to scale)

**DETAIL NO. P-20.** Brick Veneer construction with windbreaks set flush with sheathing.

**DETAIL NO. P-36A.** Solid masonry wall with S. C. R. brick construction. Lath and plaster applied on 2" furring strips.

#### NOTE

Complete 1/4 scale installation details will be found in the Tracing Detail File. This will be mailed on request at no charge.

Note: Allow for Wide Windbreaks when applying Sheathing before unit is installed. See details above.

THE CINCINNATI SASH & DOOR CO.

Note: See Page 55 for prices on the New Andersen Self-Storing Combination Window.

# THE LAST WORD IN SELF-STORING COMBINATION WINDOWS

The New ANDERSEN Combination Window blends in with your home! Here is a sturdy Self-Storing Combination Window that performs all the feats of any other combination window *and more*; yet maintains a majestic "Window Beauty" that adds, rather than detracts, to the appearance of your home. The narrow wood frame is a strong  $1\frac{1}{2}$ " thick; it may be painted the color you desire that lends itself best to the rest of your home. A very thin border of the aluminum-edged storm panels and screen is revealed to elegantly frame the glass area. In most parts of the country there is a need for a storm and screen window of some kind . . . be sure that you specify one that not only eliminates tedious work but one that compliments the architecture of your home . . . THE ANDERSEN Self-Storing Combination Window.

## NOTE THESE FEATURES

Lower Storm Panel slides easily along plastic track, is held firmly in place in any one of numerous open positions.

Aluminum Screen is wired with aluminum Alclad cloth and may be left in place the year around, however, if desired it may be stored in the upper half of the unit. Upper Storm Panel is easily removed in a similar manner.

The ANDERSEN Combination Window is built in a conventional manner and complete unit swings open to permit cleaning. Complete Unit may also be easily removed by lifting it off of hanger allowing easy access to your window.

THE CINCINNATI SASH & DOOR CO.

## THE NEW Andersen SELF STORING COMBINATION WINDOW

### KNOW WHAT YOU ARE PURCHASING

COMPLETE UNIT INCLUDES: Wood Frame, Pine,  $1\frac{1}{2}$ " Thick, treated with a Toxic Water Repellent Preservative; Two Aluminum Frame Storm Panels, and One Aluminum Screen, and all necessary Hardware. An extra Screen may be ordered if full screening is desired.

EXTRA MODULAR SIZES IN ADDITION  
TO REGULAR PRESSURE SEAL SIZES TO  
ACCOMMODATE ALL STANDARD OPENINGS.

Spring Bolt Fasteners snap into place to hold Lower Storm Panel firmly in position, eject to allow panel to be easily raised or lowered. Plastic track provides smooth operation, eliminates galling (no metal against metal).

Nylon Retaining Clip holds Lower Storm Panel in place when in the raised position, allows center ridge of plastic track to be eliminated so that panel can easily be removed from unit.

Screen installed in normal operating position. Upper Storm Panel in place, and Lower Storm Panel in partial open position. Note strong center bar that adds a tight seal to storm panels and sturdiness to the frame.

Screen installed in upper self-storing position, Upper and Lower Storm Panels in place. Note that Lower Storm Panel is still able to operate by sliding in front of Upper Storm Panel and Screen.

Dual purpose hinges permit swinging the sash from either top or bottom. Hinge members for both positions are attached and sash can be instantly reversed or removed without tools.

DETAIL B-40. Shows typical installation in concrete block wall with poured sill.

Scale 3" = 1'-0"

A practical and widely used factory assembled wood basement window that successfully combines the weather-tight and insulating advantages of wood windows plus large glass areas and easy installation. Comes as a complete, factory assembled unit with frame set-up, sash glazed and hung, screen fitted and installed and all hardware installed.

#### NEW AND IMPROVED FEATURES

**FRAME**—paint primed in addition to toxic treating for greater protection during construction.

**SASH**— $1\frac{3}{4}$ " thick with one piece lock rail for more strength. Groove glazed to eliminate putty failure.

**HARDWARE**—improved lock with hinging hardware recessed to accommodate forms for poured walls.

**SCREEN**—wood frame with aluminum screen cloth. New design has recessed moulding and rabbet to receive metal edged storm panel.

**STORM PANEL**—Has narrow aluminum frame for more glass area, quick installation and easy storage.

#### NEW STORM-SCREEN FEATURE

The screen frame is rabbeted to receive the aluminum framed storm panel (furnished as optional equipment) which goes on from the inside and comes complete with fasteners.

Corner section of screen showing rabbet for glazed storm panel.

Sectional view showing storm-screen with storm panel in place (optional equipment).

#### MODULAR SIZES

Sizes have been standardized to fit typical 16 x 18 inch block walls for masonry openings 2 blocks wide by 2,  $2\frac{1}{2}$  and 3 blocks high.
